## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The information disclosure statement filed January 10, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Specifically, a copy of German document 190 13 222 has not been supplied. The examiner has found EP 0 800 035 which is thought to be equivalent.

### ***Claim Objections***

Claim6 is objected to because of the following informalities: Claim 6 is comprised of two sentences. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 5-7, 8, 10, 12-16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goetzberger (EP0800035 A1) in view of Murphy, Jr. (U.S. Pat. No. 4773733). Goetzberger teaches the salient features of the claimed invention as discussed in applicant's

specification including the CPC. Goetzberger does not teach that the CPCs are provided such that the segment top side is shaped at least partially curved or edged transverse to its longitudinal expansion. Murphy teaches that it was known to provide light collectors such that the segment top side is shaped at least partially curved or edged transverse to its longitudinal expansion. The applicant is directed to review figures 1-3 and 7. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features taught by Murphy for the purpose of greater sun collection.

*Allowable Subject Matter*

Claims 3-4, 9, 11, 17, and 19-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
